Problem Domain: Lost & Found Management + AI / Computer Vision

Team Name: AGILE

Team Leader: Akriti Srivastava

Team Leader Email: akritisrivastava.dpsg@gmail.com

Team Member: Aditya Pandey

Team Size: 2

PROBLEM DEFINITION

01 — LOST

Student looking for missing backpack/wallet.

02 — FOUND

Another person finds the object but doesn't know the owner.

03 — GAP

Two disconnected reports with different descriptions.

Example contrast:
"Black backpack" vs "Dark school bag"

THE ITEM IS FOUND — BUT THE OWNER IS NOT.

04 — THE GAP

Lost Report:
"Black backpack"
Library
10:30 AM

No intelligent link connects the item to its owner.

Found Report:
"Dark school bag"
Cafeteria
11:15 AM

PROPOSED SOLUTION

"We don't just find lost items — we find their owners."

Report item → AI analysis → Match reports → Verify ownership → Reunite owner & item

01 SMART MATCHING

- Image
- Description
- Location
- Time

02 MULTIMODAL AI

- Image Understanding
- Text Understanding
- Context

LOST REPORT (Backpack photo + description)

FOUND REPORT (Backpack photo + description)

AI Matching Engine → POTENTIAL MATCH → OWNER VERIFIED ITEM REUNITED

03 OWNERSHIP VERIFICATION

Claim → Private Detail → Verified Owner

04 REUNITE

Found person → Rightful owner

Target Beneficiaries

Students & Campuses

Individuals & Communities

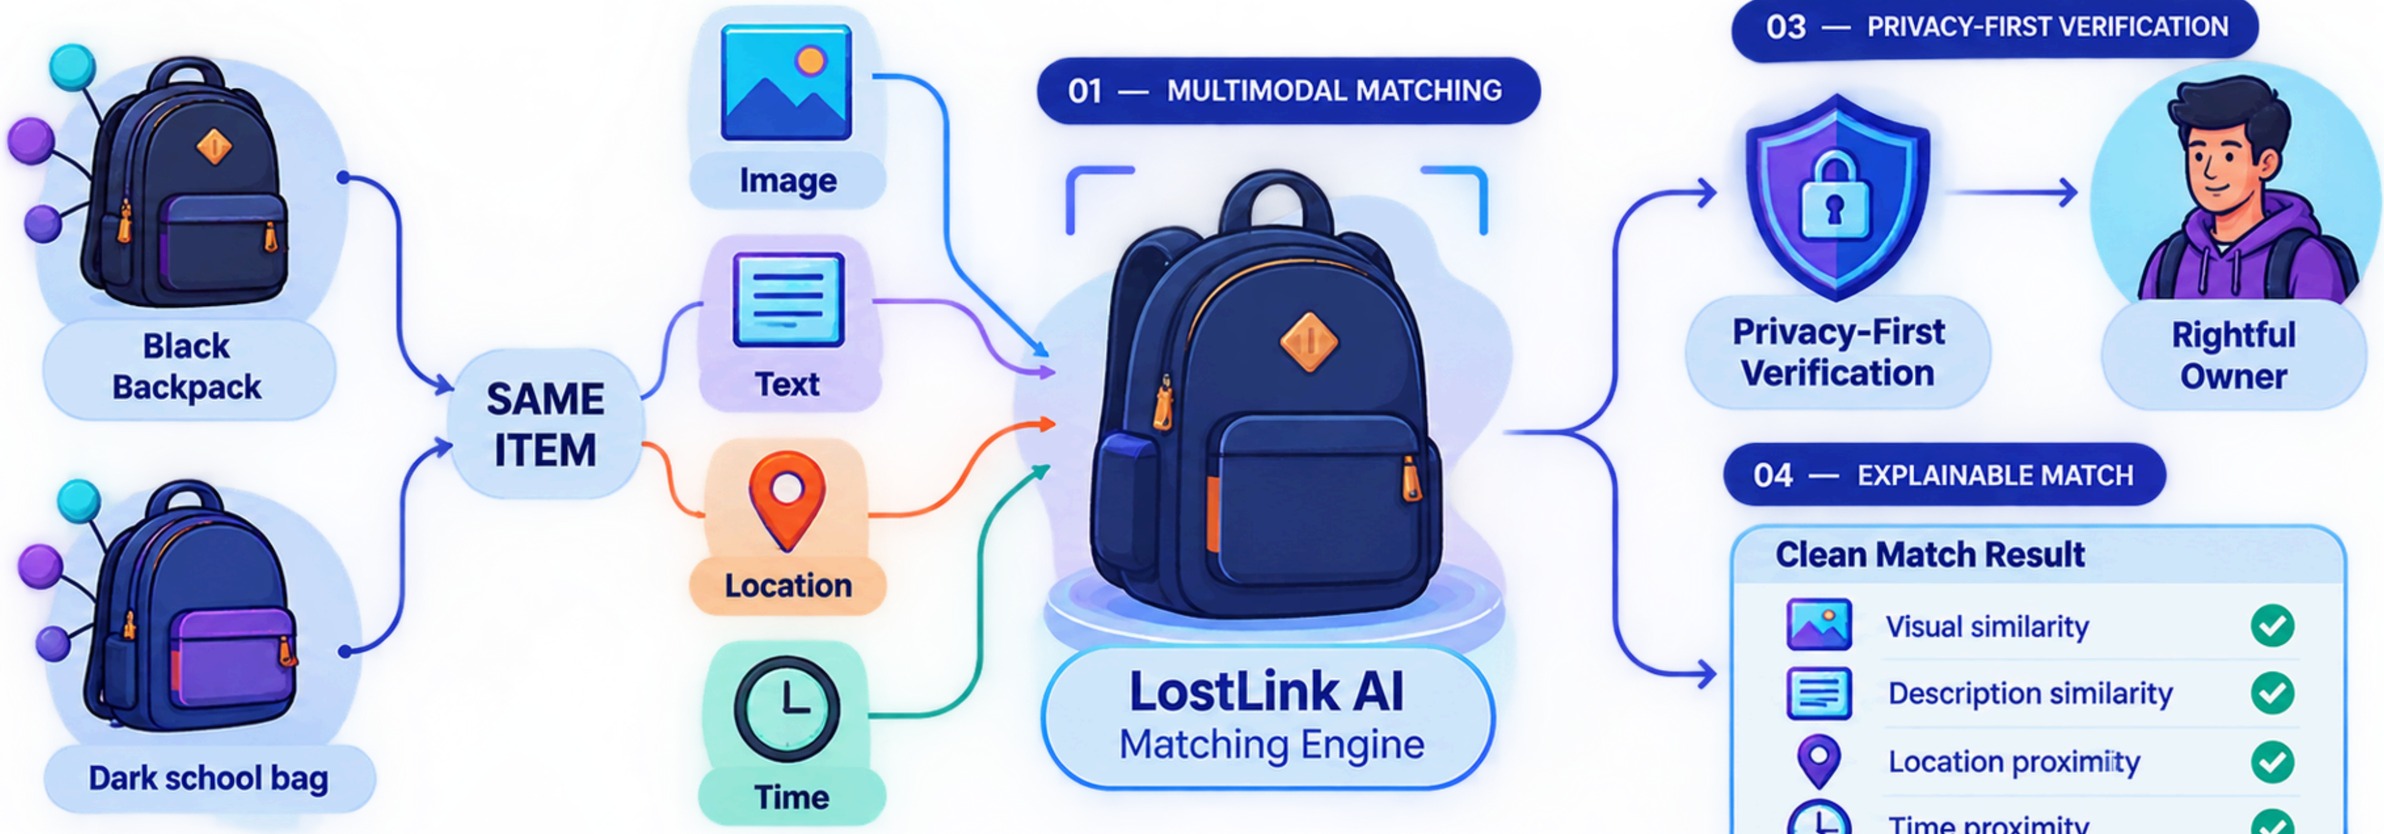

Organizations & Institutions

Lost & Found Teams

INNOVATION & UNIQUENESS

"From finding objects to intelligently finding their owners."

IMPLEMENTATION ROADMAP

01 VALIDATE
(Problem 🔍)

A VALIDATE
(Problem 🔍)

- Problem research
- User needs
- Use cases

02 DESIGN
(Solution ✏️)

DESIGN
(Solution ✏️)

- UI/UX
- Database
- AI architecture

03 DEVELOP
Build, visual centerpiece

Developer

- Frontend + Backend
- Multimodal AI
- Match Engine

04 TEST
Validate

TEST
Validate

- Labe/round cases
- Match accuracy
- Privacy verification

05 DEPLOY
Deploy & teach users, destination feel

Destination feel

- Web deployment
- User testing
- Campus/community rollout

Research → Prototype → MVP → Validation → Live Platform

KEY RESOURCES

User Feedback | Figma + Architecture | React + FastAPI + AI | Sample Data + Testing | Vercel + Render

IDEA SUMMARY

Tap the icon for Video and Images

01 Problem

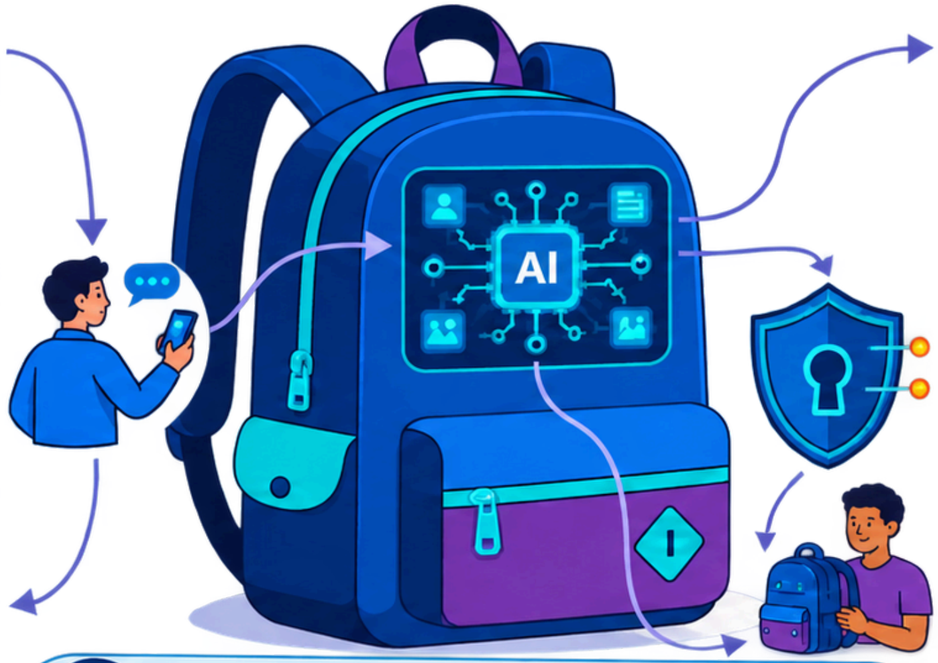

DIFFICULT to IDENTIFY FOUND ITEM OWNERS

02 Solution

MULTIMODAL AI MATCHING SYSTEM

04 Impact

INCREASED RETURN RATES & COMMUNITY TRUST

03 Innovation

MULTIMODAL AI & SECURE PRIVACY

Students Campuses Individuals Organizations

05 Roadmap
